High precision bearings

That meet OE specifications.

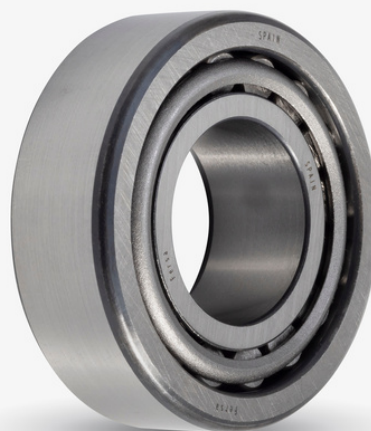

Easy for you

All the material you may need in a single kit.

Tapered Roller Bearings

- Designed to support combined loads (radial and axial), thanks to the tapered geometry of their components.
- Configuration that allows for smooth and uniform rolling movement, minimizing friction and wear.
- Optimized housing, facilitating fit and installation.
- High resistance and durability, adaptable to various operating conditions.
- Applications in drive shafts, gearboxes, and wheels, providing high performance and longer service life for specific applications.
